

ATS PRAYER™ (Yoke Style Nozzle Body)

The ATSprayer uses a yoke style nozzle body manufactured by AmertechTowerServices and is used for direct replacement in cooling towers which have Research-Cottrell, Hamon Cooling Tower or Ecodyne yoke nozzle bodies.

COMPATIBILITY

The ATSprayer and associated parts are interchangeable with your existing OEM nozzles and parts. Our nozzles, orifices and accessories are the exact size, style and materials of your existing OEM parts.

NON-CLOGGING DESIGN

The ATSprayer is designed to provide a non-clogging nozzle with a large overlapping spray pattern and increased efficiency.

QUICK DELIVERY

All parts are kept in stock and ready for overnight delivery.

ADAPTOR SELECTIONS

Adaptor selections include 6", 8" and flat (for any pipe diameter above 8"). The adaptors can be fastened to your piping using one or a combination of all three of the following methods; solvent welded, screwed and banded.

REMOVABLE ORIFICE

The ATSprayer has incorporated a ridge within the throat of the nozzle in order to prevent the orifices from becoming dislodged or pushed out. Orifices range from .69" to 1.65".

INDIVIDUAL SUPPLY

We can also supply separately; splash plates, orifices, nozzle bodies and adaptors.

ATS PRAYER

ASSEMBLY

Full assembly or individual supply is available on all parts.

We can provide installation and repair services for your cooling towers.

ATDAPTOR- PERIMETER NOZZLE ADAPTOR

Adaptor made to fit NPT and Acme threaded adaptors

Do you have asbestos piping in your cooling tower and want to upgrade your perimeter nozzle sprayer system, BUT don't want to pay the high cost of asbestos pipe removal? ATS has your solution, we manufacture an adaptor which threads into your existing NPT threaded adaptor and a bottom in which you can install ACME threaded high efficiency nozzles, such as the ATP Sprayers or PFC nozzles. The adaptor is in stock and ready for immediate delivery.
